Precautions

1. Turn off the power when inserting or removing the Game Pak.
2. This is a high precision game. It should not be stored in places that are very hot or very cold. Never hit or drop it. Do not take it apart.
3. Avoid touching the connectors and do not get them wet or dirty. Doing so may damage the game.
4. Do not clean with benzene, paint thinner, alcohol, or other such solvents.

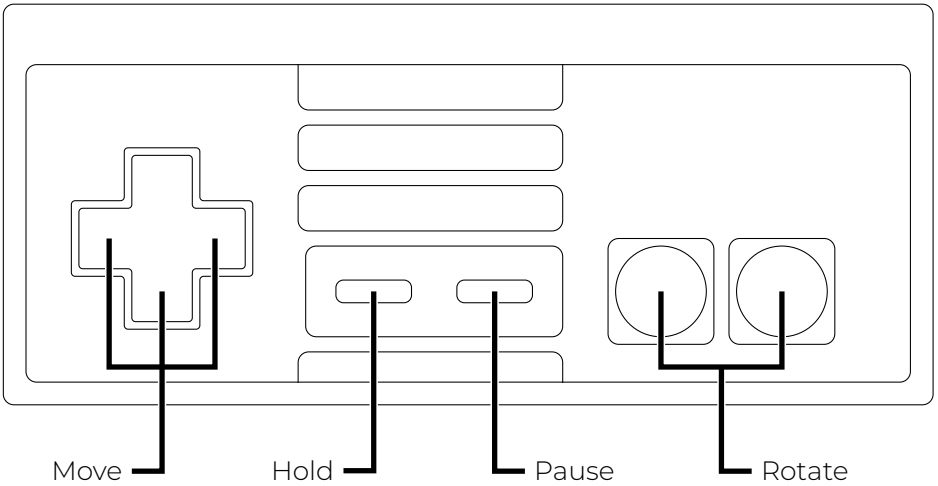
Object of the Game

Move and rotate the falling blocks to keep your well clean. There are thirteen different pieces you'll have to manipulate, each with its own unique pattern. If you can fill up a horizontal line with eight blocks, then that line will disappear! You'll be rewarded with points and you'll have more room to build in. The more you clear at once, the more points you'll get!

Pieces fall in a random order, but they're careful to mix themselves up a bit. You won't ever see three cross pieces in a row, for example. If you bring a friend and play in two-player mode, each of you will get the exact same pieces in the same order, so you can really see who's got the best chops!

Watch out! Everything will grow faster and faster as you progress. If you're not careful, a single mistake can quickly spiral out of control! But if you keep calm, then nothing can stand in your way.

Controls



Getting Started

When you first start the game and after each round ends, you will find yourself at the title screen.

Use ▲ and ▼ to select how many players are playing. Use ◄ and ► to select your preferred music.

Press **A**, **B**, or the Start button to begin the game.

Gameplay

Press ◄ or ► to move your piece left or right. Keep them held to keep moving. Once you're lined up, you can hold ▼ to more quickly settle your piece in place.

Press **A** to rotate clockwise, or **B** to rotate the other way. If your piece is up against a wall or some other pieces, it might move away so it can have room to rotate. It will try rotating in place, and if that fails it will try moving one block in each available direction. This might help you out of some tight spots!

Press the Select button to set your piece in the holding area. If another piece is already there, it will be kicked out and you'll have to place it in the well. You won't be able to hold again until a piece is locked in place.

Completing the Game

Your game is over when your well fills up so far that a new piece tries to appear in the same place as an existing piece. In a two-player game, both players' wells must fill for the game to end.

How long can you last? When the game ends, you might find you've got a high score! Use ◄ and ► to move your cursor and Use ▲ and ▼ to select a character. When you've finished entering your name, press the Start button to confirm.
